Employment Rates Report

2014

Prepared by
The Office of Institutional Research
January 21, 2014

Employment Rates for OSUIT Summer 2012-Spring 2013

Executive Summary

For OSU Institute of Technology, employment data has been somewhat difficult to obtain in the recent years. An attempt had been made to gather employment data from the Graduate Exit Interviews (GEI) which were collected by the departments from their graduating students. Some students completed the GEI, some chose to fill in minimal information, and some chose not to submit the survey. Since there was a lack of usable data, the academic departments were asked to provide employment information on their graduates. Many faculty and staff members of the academic departments have kept in touch with their graduates, so this information was readily available. If the department did not have this information, they were asked to contact the graduate for the information. The data tables following this summary are based on data collected from the departments and GEIs. If employment information was not provided by the departments, the completed GEI was then used. This employment information is strictly based on employment and no other factors such as continuing education or military service.

There were 788 degrees awarded for summer 2012, fall 2012 and spring 2013 to 747 graduates. Of those 747 graduates, 397 (53%) submitted employment information. Of the 397 graduates who submitted information, 383 (96%) were employed full-time. Of the same 397 graduates, 361 (91%) were employed full-time in their major field.

If we look at the technical divisions only, we find that there were 589 graduates. Sixty-six percent (387) of these graduates provided employment information. Of these 387 graduates, 97% (376) were employed full-time. Of the same 387 graduates, 92% (357) were employed full-time in field.

Another way to look at our graduates is to focus on the AAS and BT completers only. There were 594 graduates who received an AAS or BT degree during this time period. Of the 594, 389 (65%) submitted employment information. While 97% (377) of the 389 graduates were employed full-time, 92% (357) of the 389 graduates were employed full-time in their major field.

The average salary for the full-time in major field graduates remained in the range of \$30,000-\$39,999 regardless of breakdown. Pay for graduates employed full-time in field started in the range of \$15,000-\$19,999 and the highest pay range was reported as \$100,000-\$109,999. The Watchmaking division and Engineering Technology BT graduates had the highest average salary of \$50,000-\$59,999.

Given the results of the various ways to breakdown our available employment data, we can definitely say that of our AAS or BT graduates who supplied employment information, 97% reported themselves as employed full-time and 92% reported as employed full-time in their major field area.
