<b>OSUIT Nursing Program Grading Scale</b>	
A	= 92-100
B	= 84-91
C	= 75-83
D	= 66-74
F	= 65 & below

**PROGRESSION OF THIS COURSE IS BASED ON THE FOLLOWING:**

To pass this class must achieve at least an overall course average of 75%

**GRADING PROCEDURE**

- Daily and/or weekly quizzes, graded immediately upon submission
- Small weekly assignments and similar type projects: Normal return time to student by next class meeting or no later than one (1) week.
- Extensive assignments, large projects: Normal return time to students in two (2) weeks.
- Rubrics specific to the assignment are provided as a part of assignment directions when appropriate.

**RECOMMENDED STUDENT COMPETENCIES/SKILLS**

Use an online database for research; critically analyze research articles and apply them to nursing practice; effectively and professionally verbal communicate with classmates and industry professionals; navigate the Online Classroom to complete quizzes, discussion posts and assignments; complete a professional resume

**WRITTEN ASSIGNMENT GUIDELINES**

All paperwork is to be submitted electronically to the appropriate dropbox folder in the online classroom (LMS). At no time will emailed or printed assignments be accepted. Graded paperwork will be returned to the corresponding dropbox on LMS and will be accessible via the “feedback” mechanism.

**Course Assignments:**

- a) Written Assignments: see the instructions and rubric posted in the LMS for details, due dates and grading rubrics
- b) Assigned Discussion: in module 4, you will be asked to respond to a question posted by the instructor. You will provide an original post answering the question prior to the visit to the Oklahoma Board of Nursing and a follow up post after the hearings. Grading rubrics and due dates for each discussion are posted in LMS.
- c) Additional Discussion: you will also find discussion forums in which you can post general questions, comments, etc. This forum is viewed by the course instructor and visible to all students, but is not graded.
- d) Class participation: for each module there is a scheduled face to face activity, labeled “lunch and learn” on the course calendar. Students are expected to have read the corresponding text material and reviewed the online lecture prior to this event. Points will be awarded for participation and other assigned activities as posted. Activity details and grading rubrics are posted in the LMS.

**Evidence Based Practice Poster Presentation:**

Develop a poster on a current trend or issue in nursing. The poster will be presented for viewing, and the students will give an oral presentation to describe and promote the poster and topic to the instructor when asked on day of presentations. Students will partner with another student (two students to a poster). Posters will be presented to the campus community. The poster should be standard size of the tri-fold type of posters utilized for presentations.

**What is the goal of this assignment?**

The purpose of this assignment is for you (and one or two other students) to identify a practice question, search and analyze the literature for an answer and then present your question and answer in a poster session format utilizing the evidence you find.

You will present and defend your poster in a public poster presentation session. Three judges from the nursing community will evaluate your posters and oral presentation of your finding and awards will be presented in two categories: design and content.

**Evaluation Criteria:**

Students will be evaluated on content, accuracy, effectiveness of written and oral presentation, overall design and mechanics. Assignment specifics including rubric will be posted in advance.

**AUTHORIZED TOOLS**

Students may use any/all course materials, including books and notes, while completing quizzes.

All quizzes and written assignments are to be completed independently; no collaboration with classmates is permitted and any instance of such will be considered academic dishonesty.

**LATE WORK**

**Students are expected to comply with course due dates.** Please notify me if you cannot comply

with the due dates as posted in the syllabus. There will be a penalty of 5 points per day up to 7 calendar days on written assignments. After 7 calendar days, the assignment will receive a zero. Late posts on discussion boards are penalized according to the posted rubrics. No posts will be permitted past the posted end date of the discussion.

### **TESTING**

Examinations are scheduled in the course syllabus; any changes will be announced at least one week in advance. Quizzes should be completed within the dates they are assigned. If for some reason you are unable to complete a quiz by the posted due date, please communicate with the instructor as soon as possible. It is not reasonable to expect that examinations be rescheduled except in the case of an **EMERGENCY** absence, e.g. death in the immediate family or significant illness of the student.

**Students will be allowed to attempt quizzes 2 times but must score at least 65% on the first attempt before they will be allowed a second attempt.**

### **KAPLAN INTEGRATED TESTING PROGRAM**

In order to aid in the progress and success of our students, while lowering our program's attrition rate and strengthening the NCLEX-RN pass rate, OSUIT's Nursing Program has implemented Kaplan's Integrated Testing Program for nursing schools. This program is comprised of a series of tests designed to evaluate the knowledge of students in a basic nursing curriculum leading to RN licensure. The results enable nursing faculty to identify students with knowledge deficits in specific content areas, so that early interventions can be implemented in order to positively influence student outcomes. Kaplan Integrated Tests will be given in appropriate semesters as outlined in the student handbook. ***Students should be aware that their ability to pass the NCLEX-RN is strengthened by their ability to pass each series of test.*** **The Kaplan Integrated Exam for this course is Management/Professional Issues which is mandatory, & proctored in the computer lab—benchmark score is 55<sup>th</sup> percentile for this exam.**

Students performing well on the integrated tests may receive points based on their percentile score. Points will be based off of percentile ranking and will be awarded only after successfully passing the course. Students with course ending average of less than 75% will not receive extra credit points. Points will be awarded as follows:

A total of 1-3 % points will be added according to the student's average percentile ranking score

55-65 percentile = 1 point

66-80 percentile = 2 points

81-100 percentile = 3 points

If multiple tests are given during the semester the points will be averaged. For example: If 3 tests are given and the test scores are in the 59, 70, and 84 percentile the student will receive points based on  $1+2+3=6$  divided by  $3 = 2$  % points

### **ONLINE COURSE INTERACTION**

OSUIT requires all online courses to include interaction between students, peers and instructors. Our online courses use a variety of tools to build a community of learners and strengthen engagement between students and their peers, as well as between students and the instructor. Communication tools used in courses may include Discussion, News, and Email. Read the

syllabus completely to determine which of these methods you, your classmates and your instructor will use for interaction.

General guidelines for student conduct while interacting within an online course include: (1) Use proper language in all communications; (2) Harassment of any type will not be tolerated; (3) No jokes, insults or threats of an offensive nature.
