ETDG 1523 Architectural Design – Syllabus – Spring 2018

Section: 20026

Course Description:

The theory and preparation of construction documents for residential structures including problems in basic architectural design, space planning, materials, human factors and environmental issues related to architectural design.

Course Purpose:

The purpose of this class is to teach Architectural Modeling software. This will be accomplished by creating Architectural Drawings, Details, Floorplans, etc., and by using proven design techniques.

General Information:

Type of course: Theory / Lab

Credit Hours: 3

Total clock hours of theory per semester: 50

Total clock hours of lab for the semester: 25

Additional lab work outside of class may be required

Class length: Full Semester

Class format: Face to Face / Online

Class days and times: M,W,F: 8:00am – 9:25am.

Corequisites: Math 1513 if needed

Prerequisites: Intro to Design/Drafting 1143, Arch Modeling 2143.

Instructor Information:

Instructor Name: Chris Burris

Instructor Phone: N/A

Instructor email: chris.burris@okstate.edu

Contact: My preferred method of contact is via email. Please allow 24-48 hours to return your correspondence during the normal work week.

Office: Reynolds Bldg. Room 212 inside Classroom 206

Instructor's Office Hours: M,W,F: 9:30am-11am (In office or classroom)

Division Name: School of Engineering

Division's Main Phone: 918-293-5150

Required Text, References, and Materials:

Texts: Jefferis, A., & Madsen, D. (2016). *Architectural drafting and design* (7th ed).
Delmar Cengage Learning. ISBN# 978-1-2851-6573-8 - \$130

Software: Autodesk Revit 2018 - \$Free to students.

Materials: Paper or notebooks, writing utensils, USB Flash Drive 1GB or larger - \$15.

Estimated Total Costs: \$145

Course Learning Assessment:

Upon completion of this course students will be able to do the following:

Course Outcomes:

1. Architectural - Apply building codes, materials and building methods that effect commercial & residential construction.
2. Architectural - Design a light commercial project to industry specifications.
3. Architectural - Design a residential project to industry specifications.

Course Objectives:

1. Create floorplan drawings.
2. Create drawings to ADA requirements.
3. Apply design techniques to optimize room layout.
4. Create a building model using 3D architectural software.
5. Create roof plan drawings.

Aspects of the course objective assessments may be used in the university's assessment of student learning.

Course Activities:

In this course students may be required to:

- Participate in class discussions and activities.
- View videos that depict the various concepts.
- Contribute to a course Service Learning project.
- Participate in group and individual presentations.
- Compile a portfolio of work produced.
- Take examinations and/or quizzes.
- Complete reading assignments.
- Complete work demonstrating abilities, methods, and processes.

Evaluation:

Grades will be based on the quality and completion of these areas:

Assignments	60%
Performance Tests	25%
Final Project	10%
Portfolio	5%
<hr/>	
Total	100%

Grading Scale:

- A : 100% - 90%
- B : 89% - 80%
- C : 79% - 70%
- D : 69% - 60%
- F : 59% - 0%

The student's grade for assignments will be used in the university's assessment of student learning. A 70% competency or higher receives a Pass rating. This Pass/Fail rating is independent of the student's course grade.

Daily and/or weekly quizzes, small weekly assignments and similar type projects: Normal return time to student is about one (1) week.

Extensive assignments, large lab projects, extensive quizzes, exams and similar type projects: Normal return time to students in about one (1) to two (2) weeks.

RECOMMENDED STUDENT COMPETENCIES/SKILLS

A good working knowledge of computers, file management, Internet/webpage navigation, and note taking skills will be helpful in this course.

Authorized Tools:

Students are required to bring their own personal USB Flash Drive for saving files and drawings on. 1GB or larger recommended.

Students may use any/all course materials, including books and notes, while participating in classroom activities.

Late Work:

All assignments and Tests will have specific due dates and are expected to be completed and turned in before class time on that date. Students will be given ample time to complete all tasks before they are due. No late assignments or test will be accepted, any work turned in after it's designated due date WILL NOT be graded and result in a zero. There will be NO MAKEUP WORK offered for this course.

Testing:

All quizzes and tests are to be completed independently; no collaboration with classmates is permitted and any instance of such will be considered academic dishonesty. All exams must be taken on the date of the exam; there are NO MAKEUP EXAMS offered for this course.

Modules:

The course content for this course is organized into individual modules. Modules can be thought as a lesson unit, or a series of related topics, which will be covered in class. Each course module handout provides a list of the learning objectives, instructions and specifications for assignments and key terms. Assignments are in general due at the completion of a module.

Note that modules are organized by content and not by week. Therefore some weeks will have more than one module and some modules may take longer than a week to complete.

Presentations:

This course may require that students give one or more formal presentations to the class. On a presentation day, students are expected to be punctual, professional, and have all components of the assigned project with them, ready for presentation.

All students will be required to critique each presentation giving constructive positive and negative feedback. All students are asked to be respectful and tactful while reviewing others' works, and receptive to criticisms of their own work.

Online Learning Management Site (D2L / Brightspace):

All course materials will be provided through online access at: <https://online.okstate.edu/>
Students will have access to course materials, including modules, Power Point lectures, quizzes, assignments and resources. Students will also be required to submit all work through this online system, unless otherwise noted.

Student Progress:

Students can keep track of their grades and due dates using the online learning management site grade book and calendar features. Students who are averaging below a 70% after the 8th week should speak with the instructor.

Use of Copyrighted Materials:

Students are prohibited from using any copyrighted drawings, images, audio, footage and characters for the creation of their work. (ie. Celebrity photos, movie screen grabs, drawings of copy righted logos, characters, etc. and so forth). Students must use their own content for all assignments.

All Viewing Audiences:

All materials produced for this course must be appropriate for viewing audiences of all ages. Assignments **MUST NOT** contain any offensive language, graphic content, and suggestive themes (ex. sex, drugs and alcohol). Your instructor must first approve any content you are unsure of; chances are if you are unsure then it is not appropriate content. Any assignments turned in which breaks this rule **WILL NOT** be graded.

Key Terms:

Key Terms are Notes, Key Words, and Terminology about a specific subject. The Key Terms come from the test and are provided to you as a study guide. Do **NOT** simply write the definitions of Key Terms. Take the time to take Notes about, Research, Explore, and **USE** each Key Term. By completing the Key Terms you will have better scores on the tests.

Assignments File Name:

Unless otherwise noted in the module, all assignment file names should begin with the student's last name followed by an underscore and the lesson prefix, then the file extension. If the student's name is Stu Dent and his assignment is Module 01 A, and he is to turn in a MS word file, then the file name should be as follows: **Dent_Mod01A.doc**

Assignment files, which are **NOT** named in the following format, run the risk of not being graded. Ensure that you have correctly named your assignment before turning it in.

Professionalism:

Professional behavior is essential for successful student and effective learning environment. Therefore professional behavior is expected of all students. Students in this course are required to conduct themselves professionally in class. This includes the following behaviors, but are not limited to:

Appearance: A professional appearance includes professional attire, excellent personal hygiene, civility and poise, all qualities, which are quickly noticed by employers. Dressing for success means dressing the part of a successful professional, therefore we encourage students to wear business casual attire to class. Students are required to wear business attire at all formal events and presentations.

Collaboration: Collaborates with team members, adapts readily to different positions on the team; shows respect for all team members; remaining flexible and open to change; communicating with others to resolve problems.

Communications: Speaking clearly; writing legibly; listening actively; adjusting communication strategies to various situations.

Ethical Conduct: Submitting work of the student's own original creation; paraphrasing and citing all references; no lying, cheating, or plagiarism.

Integrity: Consistent honesty; prompt admission and correction of mistakes; trustworthy with the property of others and confidential information; value accuracy and thoroughness; avoids derogatory or demanding remarks.

Participation: Actively participates in class; volunteers for activities; asks questions and summarizes lesson content.

Preparedness: Bringing all required course materials (such as: text books, pencil, paper, flash drive) to each class period.

Respect: Being polite to others; not using derogatory or demeaning terms; appreciates the value of diversity; demonstrates clear, appropriate and cultural boundaries; behaving in a manner that brings credit to the profession.

Self – Confidence: Demonstrating the ability to trust personal judgment; demonstrating an awareness of strengths and limitations; exercises good personal judgment.

Self – Motivation: Taking initiative to complete assignments; taking initiative to improve and/or correct behavior; taking on and following through on tasks without constant supervision; showing enthusiasm for learning and improvement; consistently striving for excellence in all aspects of design and professional activities; accepting constructive feedback in a positive manner; taking advantage of learning opportunities

Time Management: Consistent in completing tasks and assignments on time; utilizing class time to the fullest.

Classroom Policies:

All classroom policies are in place to ensure a safe and productive learning environment. Violating any classroom policies may result in but not limited to, verbal reprimand in class, written reprimand with a copy placed in your records, expulsion from the classroom for the class period and possible expulsion from the course or school. These policies include, but are not limited to the following:

- A positive learning environment will be maintained at all times.
- Students are to behave professionally in the classroom, no feet on desks and chairs, no foul language, etc. Any unprofessional behavior will not be tolerated.
- Students are to maintain time-on-task. The way you spend your time is vital to your success in the program.
- No food or drink is allowed in the classroom. These items can easily damage expensive computers and electronic equipment.

- Use of personal electronic devices is not allowed in the classroom. Personal electronic devices include, but are not limited to; radios, TVs, tape players, CD players, MP3 players, handheld games, pagers, cellular phones, laptops etc.. All cell phones are to be turned off or set to vibrate before entering the classroom.
- Students may NOT surf the net, check e-mail or engage in similar activities during class time. Not only does it affect the person doing it, but also it is a potential distraction to others in the class.
- The School of Engineering computers and equipment are for educational use only and not personal use. Computers and equipment may only be used for school work for other classes or programs with the permission of all related instructors.
- No outside software installations will be allowed in the classroom. No games will be played on any classroom computer at any time.
- No printing during class lectures. No working on or printing of non-class related materials in the classroom.
- Avoid touching or pressing on the LCD monitors and forcefully striking the keys on the keyboards, or buttons on the mice. Be sure to shut down computer at the end of each class period.
- Downloading, uploading, streaming, sharing (peer to peer) of files not related to the class is strictly prohibited.
- Accessing or possession of illicit, offensive, obscene, or illegal materials/files is strictly prohibited and will result in disciplinary action up to and including suspension, expulsion, and/or legal action.

Online Course Interaction:

OSUIT requires all online courses to include interaction between students, peers and instructors.

Our online courses use a variety of tools to build a community of learners and strengthen engagement between students and their peers, as well as between students and the instructor. Communication tools used in courses may include Discussion, News, and Email. Read the syllabus completely to determine which of these methods you, your classmates and your instructor will use for interaction.

General guidelines for student conduct while interacting within an online course include: (1) Use proper language in all communications; (2) Harassment of any type will not be tolerated; (3) No jokes, insults or threats of an offensive nature.

For more information, go to: <http://osuit.edu/center/netiquette>

University & Course Expectations:

It is the responsibility of each OSUIT student to read, abide by and maintain a copy of the syllabus for this course. Syllabi are available on the OSUIT website.

Students understand that excerpts or portions of their work may be utilized for institutional assessment purposes. The purpose of institutional assessment is for verification of student learning and program improvement. Every effort will be made to keep this information confidential.

Additional OSUIT Campus Student Policies and Procedures are included in the syllabus attachment:

View the Syllabus Attachment, which contains other important information, by visiting http://osuit.edu/center/student_syllabus_information

It will also be in the Online Classroom (D2L/Brightspace) in the Content

It is the student's responsibility to read and abide by all policies and procedures.

Course Outline/Schedule:

WEEK:	MODULE:	TITLE:	CHPTR #:	DATE DUE:
1	00	Syllabus		
	01	Professional Architectural Careers, Office Practices, and Opportunities	1	
	02	Introduction to Construction Procedures	2	
	03	Architectural Drafting Equipment	3	
2	04	Drafting Media and Reproduction Methods	4	
	05	Sketching Applications	5	
	06	Architectural Lines, Lettering and Plan Reading	6	
3	07	Computer-Aided Design and Drafting in Architecture	7	
	08	Construction Specifications	8	
	09	Guidelines and Required Codes That Affect Building Design	9	
		Performance Test #1		
4	10	Room Relationships and Sizes	10	
	11	Exterior Design Factors	11	
	12	Conservation and Environmental Design and Construction	12	
5	13	Site Orientation	13	
	14	Legal Descriptions and Site Plan Requirements	14	
	15	Site Plan Layout	15	
6	16	Floor Plan Symbols	16	
	17	Floor Plan Dimensions and Notes	17	
		Performance Test #2		
7	18	Floor Plan Layout	18	
	19	Electrical Plans	19	
8	20	Plumbing Plans	20	
	21	Heating, Ventilating, and Air-Conditioning	21	
9	22	Roof Plan Components	22	
	23	Roof Plan Layout	23	
	24	Introduction to Elevations	24	
	25	Elevation Layout and Drawing Techniques	25	
	26	Millwork and Cabinet Technology, Cabinet Elevations, and Layout	26	
10	27	Environmentally Friendly Framing Methods	27	
	28	Structural Components of Framed Construction	28	
	29	Design Criteria for Structural Loading	29	
	30	Sizing Joists and Rafters Using Span Tables	30	
	31	Determining Beam Sizes	31	
	32	Drawing Framing Plans	32	
11		Performance Test #3		
	33	Foundation Systems	33	

INSTITUTE OF TECHNOLOGY

	34	Floor Systems and Foundation Support	34	
	35	Foundation Plan Layout	35	
12	36	Sectioning Basics	36	
	37	Section Layout	37	
	38	Alternative Layout Techniques	38	
	39	Stair Construction and Layout	39	
13	40	Fireplace Construction and Layout	40	
	41	Presentation Drawings	41	
14		Performance Test #4		
14-15		FINAL PROJECT		

*NOTE: This is a tentative schedule and may be subject to change.

Syllabus Disclaimer:

As with most technology courses this course is in a state of constant update in order to keep up with the ever changing technology and advancements in the field. This syllabus is not a contract, but a plan for action. The instructor reserves the right to alter its stipulations, upon prior notification to students, if and when educational and technological circumstances warrant changes.
